Background

To add a background to each page, you should

be in the **Edit panel**  and in the **subsection Backgrounds**

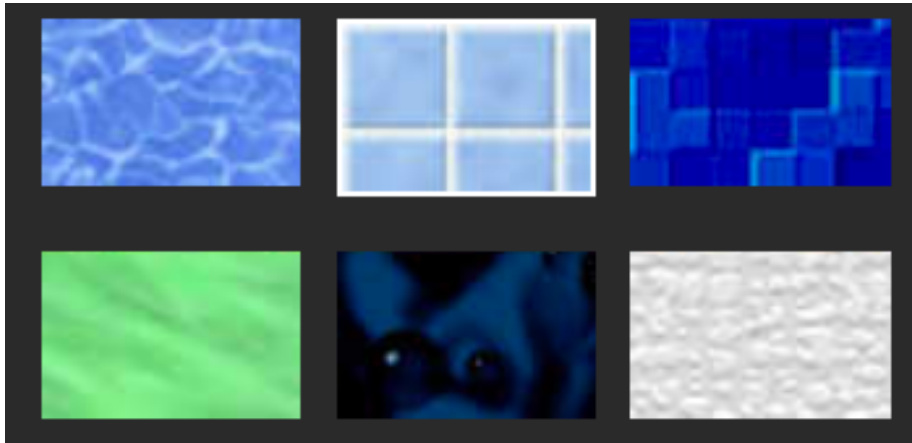

1. Display a background on a page

Option 1:

The Background section already has many suggestions of backgrounds.

If you click on one of those potential backgrounds it will automatically cover the whole page.

Option 2:

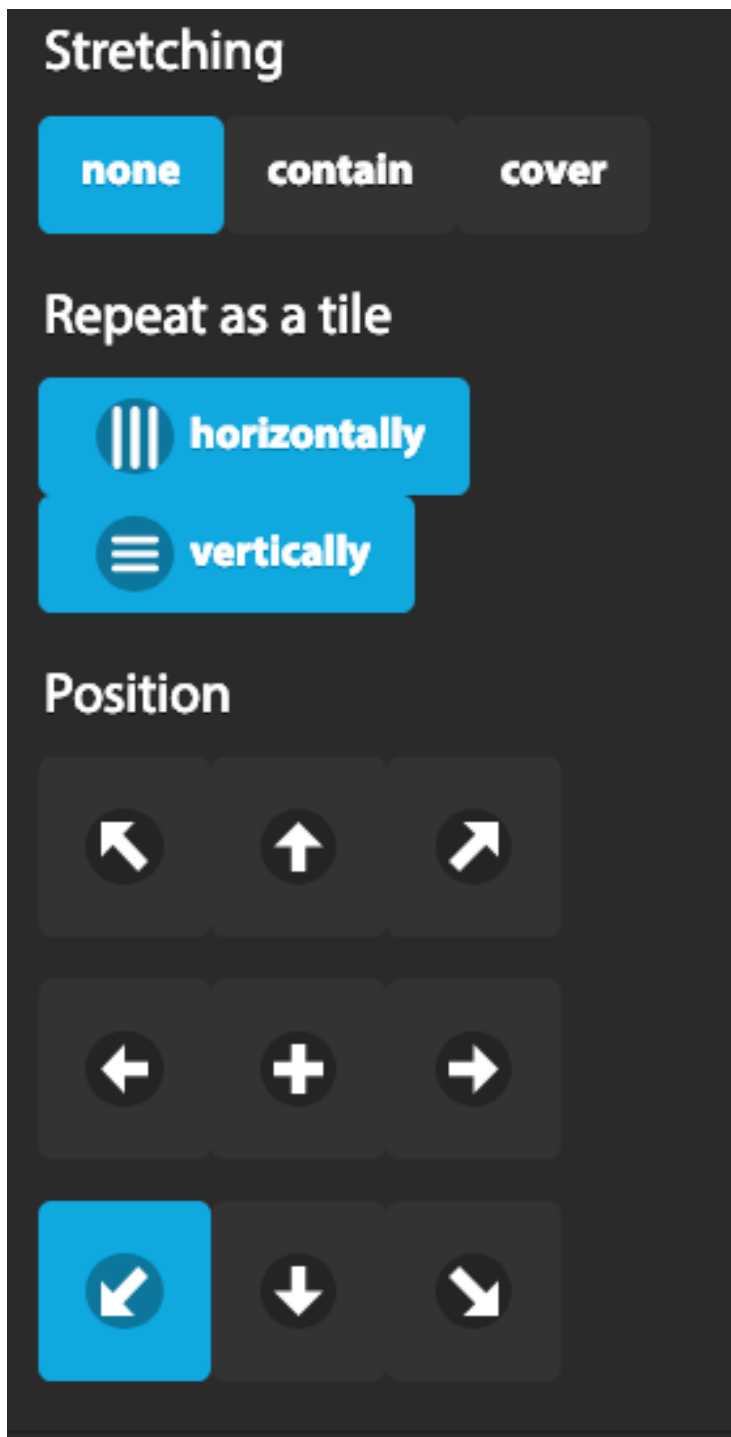

Add a background with the  button.

and it will open a window to upload a photo. Once you select the photo, it will be uploaded at the end of the library.

2. Positioning a background

Open the **panel of Positioning**

 **Positioning** where you will see the following possibilities that affect the image that is set as the background on this particular page.

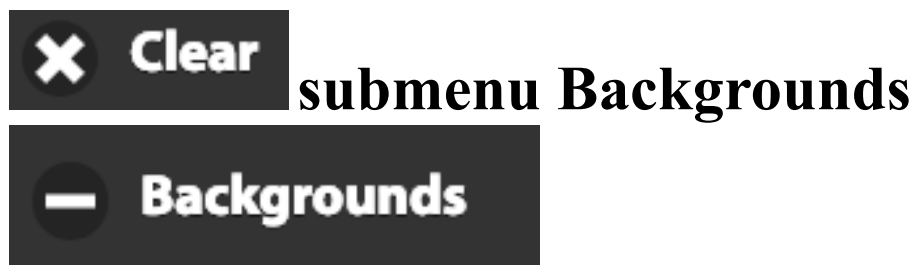

- **Stretch** stretches the image across the page

- **Repeat** as a tile repeats the image horizontally or vertically
- **Position** selects in which corner the image is anchored.

3. Disassociate a background from a page

Push the button Clear that is inside the

**You are ready to include
page backgrounds in your story!**
