

## ==== Instructions ====

*MINE Editor*

*developed by Ubium Oy*

### **Publish**

Until now your story is private.

If you want to make it public, then you need to

go to the **Export** panel 

After you click on the button a window will pop up where you have the option to publish your story:

## Publish your story:

Private

Public

Link to share:

<https://boiling-inlet-4273.herokuapp.com>

✓ Copy link to clipboard

When you select the **public** option, then you can copy the “**Link to share:**”

The link to share can be entered on websites, blogs, etc, as direct links or embedded in frames.
